**TURN GOOD IDEAS  
INTO BUSINESS**

Making offshore production and transport  
green, clean and sustainable

[www.greenoffshoretech.com](http://www.greenoffshoretech.com)

## **Join GreenOffshoreTech and turn good ideas into business!**

GreenOffshoreTech is looking for small or medium-sized enterprises with a business idea that can turn offshore wind energy, offshore fish farming, offshore oil and gas production, and maritime transport sectors greener, cleaner, and more sustainable!

### **Get funding to make your ideas a reality**

GreenOffshoreTech aims to support innovation in SMEs and the development of pioneering products, processes, and services for Green Offshore Production and Transport.

Our focus is to find SME driven innovation projects using one or more of our key enabling technologies (Advanced materials, Advanced manufacturing, Industry 4.0, Environmental technologies) that can turn offshore wind energy, fish farming, oil and gas production, or shipping and waterborne transport into green, clean and sustainable business models.

Currently, we have 3 million euros and other resources to directly fund at least 100 projects across Europe and help small and medium-sized companies.

## **Take advantage of Large-scale Demonstrators**

In addition to funding, we will use Large-scale Demonstrators to boost cross-sector innovation in SMEs and use them as an open space for regional development.

Large-scale Demonstrators encompass the efforts and activities to advance new technology from the laboratory to test and validate in increasingly realistic settings.

The objective is that a successfully demonstrated technology may be further developed into product-specific applications and then tested and certified in operational environments.

## **Benefit from our expertise by partnering with us**

GreenOffshoreTech is a cluster-facilitated project, bringing together nine of Europe's leading clusters and SME intermediaries from 15 regions and 7 countries: Norway, Portugal, Latvia, Poland, Iceland, the UK, and Germany.

We will also support SMEs by creating a favorable 'open space' for cross-sectoral fertilization, value chain innovation, and entrepreneurship.

Contact us today to find out how we can help you move forward:
